READING GUIDE

This report — *how to read it*

1 **Start here: Mental Index & Archetype** (next page)
Your overall score and archetype — a 2 minute read, direct insight into your mental profile.

2 **Then go to Priorities + Action plan** (page 11–12)
Three concrete priorities and an action plan for before, during and after the round. Cut out the tear-off card — take it to the course (in your bag or to a partner).

3 **Use Part 2 as a reference or with your coach**
Per step a scene on the course you will recognise, your five components and concrete drills — then your four factors with their lenses. Ideal to share with a teaching professional or sport psychologist before a session.

The holes and moments we describe are recognisable example situations based on your answers — not rounds we watched, but a mirror of how you describe yourself on the course.

YOUR 8 STEPS — QUICK GUIDE

Focus ★ Strongest step	8.1/10
Concentration	7.6/10
Conviction	7.0/10
Trust	6.2/10
Evaluation	7.3/10
Acceptance ▼ Biggest opportunity	4.4/10
Analysis	6.9/10
Transfer	5.2/10

HOW DO YOU READ A SCORE?

7.0–10	**Strength** — build on this; use it as an anchor under pressure.
4.0–6.9	**Working area** — functional but inconsistent; focused attention pays off.
0–3.9	**Growth area** — most to be gained here; this step costs you energy now.

'Strongest step' and 'biggest opportunity' compare your steps with each other; strength, working area and growth area say where a score sits on the scale.

WHERE YOUR MENTAL INDEX (6.6) SITS

0–3.9 · Growth area Working area 7.0–10 · Strength

MENTAL INDEX & ARCHETYPE

MENTAL INDEX

The higher your Mental Index, the stronger you experience your own mental game

You can make a sound decision over the ball and still feel unsettled walking away from it: your Mental Index of 6.6/10 captures that unevenness. Your biggest opportunity is a more dependable response when the round stops following your intentions.

YOUR ARCHETYPE

The Strategist

You win holes before you swing. Your plan is your edge.

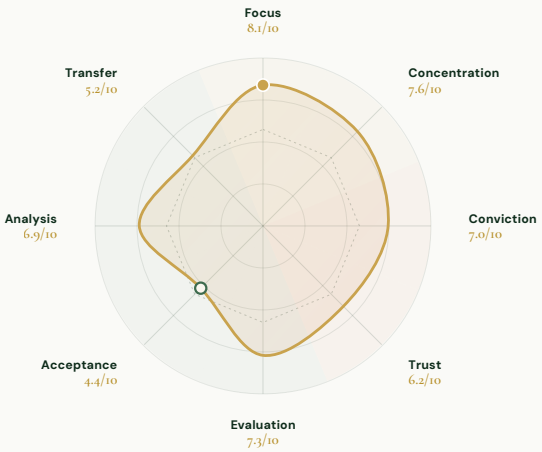

"Golf is a game that is played on a five-inch course — the distance between your ears."

— BOBBY JONES

THE STRATEGIST

PRE-SHOT SWING POST-SHOT

YOUR THREE PHASES

Pre-Shot	Focus · Concentration	7.8/10
Swing	Conviction · Trust	6.6/10
Post-Shot	Evaluation · Acceptance · Analysis · Transfer	6.0/10

YOUR FOUR INFLUENCING FACTORS

Risk appetite	4.3/10
Pressure	5.0/10
Resilience	5.8/10
Readiness	7.4/10

Not steps, but the conditions that decide whether your routine holds. Covered in Part 2.

6.6

MENTAL INDEX

The further a point sits from the centre, the stronger that step. Your silhouette shows at a glance where your foundation lies — and where the most is to be gained.

INTRODUCTION

Welcome to *your report*

FOR YOU

When you replay a round, certain moments stay sharper than the scorecard. This report gives you a way to look at those moments without turning them into a verdict on your golf. Your answers provide the starting point; the course scenes are recognisable examples, not accounts of an observed round. Keep what feels accurate, and use your next rounds to check the rest.

WHAT YOUR SILHOUETTE SAYS

With trouble tight to the right of the green, you pick a target that leaves room for a slight miss. You can shut out distractions and assess whether you played the shot you intended. Your rhythm becomes less dependable when you try to guide the club, and a disappointing result can stay with you longer than you want.

Where the shape bulges outward lies your foundation. Where it caves in lies the most gain. Part 2 tells you per step what to do about it.

"If I commit to the shot and trust my routine, the result takes care of itself."

— ANNIKA SÖRENSTAM

ABOUT THIS REPORT

How does *the MentalRoutine work?*

THE MODEL AND THIS REPORT

The model is built on sport-psychology research — how you steer attention, handle tension and stay motivated — and tested on more than 1,000 golfers, from handicap 0 to 36+. The next page shows at a glance how it fits together: three phases, eight steps with five components each, and four influencing factors with four lenses each. The report has two parts. Part 1 is your portrait: what your scores say, where your strength lies and where you start. Part 2 is your reference: every step and then every factor worked out in full, with exercises.

HOW YOUR SCORES ARE BUILT

You answer a series of questions about your routine and the factors around it — 20 to 25 minutes in all. Per step we measure five components (forty in all) and per influencing factor four sub-factors (sixteen in all). Every score is a mark from 0 to 10, based on the maximum attainable score on that component — so you see at a glance where you are strong and where the most room lies. The Mental Index (0–10) sums your eight steps in one number.

Important: these scores measure how you experience your own game — not an outside, measured performance. Read a 10 as "the top of the scale", not as perfection. Because it reflects your own experience, the scores point you straight to where it chafes for you.

THIS REPORT IS UNIQUE TO YOUR PROFILE

The course scenes, comparisons and advice in this report are not generic — they are built from your own answers and handicap (6.3). It works for golfers at every level, from handicap 0 to 36+. There is no "right" or "wrong" mental profile. This report helps you understand yourself better; it is not a medical or psychological diagnosis. Struggling with severe tension or stress around your game? Speak to a sport psychologist.

THE MODEL

One routine. Eight steps. *Every shot.*

Not eight separate parts, but one routine you run in the same order on every shot — and the terrain that routine has to get through. The shot routine tells you when something happens (before, during or after the shot), the mental routine what you do at that moment, and the influencing factors what makes it easier or harder.

PRE-SHOT		SWING		POST-SHOT			
1	2	3	4	5	6	7	8
Focus	Concentration	Conviction	Trust	Evaluation	Acceptance	Analysis	Transfer

Risk appetite 4.3
Interferes with your target and plan: the risk you accept before the shot.

Pressure 5.0
Interferes with conviction and a free swing: under real pressure your game falls back on what is ingrained.

Resilience 5.8
Interferes with processing after the shot — and decides whether a miss carries into the Focus of your next shot.

↻ *Step 8, Transfer, hands the next shot its Focus — that is how the loop closes.*

READINESS — THE FOUNDATION 7.4
Your capacity to run any of this at all: built over time, plus your state today. Readiness is not one point in the loop, but the ground under every step.

HOW TO USE THE MODEL — FOUR QUESTIONS FOR EVERY SHOT

1 · When?
THE SHOT ROUTINE
Before, during or after the shot: three phases.

2 · Which step?
THE MENTAL ROUTINE
Eight steps, each with five trainable components — forty in all.

3 · What was in play?
THE INFLUENCING FACTORS
Four factors, each seen through four lenses: knowledge, context, dialogue and self — sixteen in all.

4 · What now?
ONE ACTION
One exercise, cue or reset for the next comparable shot. You find them per step and per factor in Part 2.

Together 56 measurement points: 40 in your routine, 16 in the factors around it. Every piece of advice in this report works on one of them.

THE SHOTROUTINE

Pre-Shot · Swing · *Post-Shot*

Behind the ball, you tend to find a clear target and settle your attention. As you move into the shot, that clarity sometimes becomes an urge to guide the club rather than let it move. Afterwards, you read the result more readily than you leave it behind, making Post-Shot the least settled part of your routine.

PRE-SHOT
Preparation
7.8/10

FOCUS
CONCENTRATION

You picture the flight, weigh the miss and settle on a target, which fits your Pre-Shot score of 7.8/10.

Influenced by: **Risk appetite** 4.3/10

SWING
Execution
6.6/10

CONVICTION
TRUST

You usually intend to play decisively, but sometimes guide the club through impact, reflected in your Swing score of 6.6/10.

Influenced by: **Pressure** 5.0/10

POST-SHOT
Processing
6.0/10

EVALUATION
ACCEPTANCE
ANALYSIS
TRANSFER

You can describe the miss clearly yet keep carrying it down the fairway, reflected in your Post-Shot score of 6.0/10.

Influenced by: **Resilience** 5.8/10

Readiness 7.4/10 — the foundation under all three phases

ENERGY LEAK

Between Post-Shot and the next Pre-Shot, you can still be replaying a missed putt while taking the next club from your bag. Between preparation and execution, a settled choice can become a last-second attempt to protect the result.

PART 1 · THE BIG PICTURE

The Expectation Inside the Preparation

After your well-struck approach catches a firm slope and rolls away, you look back at the landing spot: you thought you had allowed enough room for the bounce. Chris, your strongest domain, Focus at 8.1/10, helps you choose a clear target and commit to your plan. Your Acceptance score of 4.4/10 points to an opportunity after the shot: recognising a sound decision even when the result disappoints you.

> *Your preparation helps you commit to the shot; it cannot guarantee the result.*

STRONGEST STEP

Focus

8.1/10

Build on your clear shot picture around the green: choose your chip's landing spot and picture the rollout before selecting your club. On a recovery shot, use that same clarity to pick a finishing position that gives you a straightforward next shot.

BIGGEST OPPORTUNITY

Acceptance

4.4/10

"You commit, then let go."

Chris, use this after the par putt lips out on hole 12, before you walk away still gripping the putter tightly.

YOUR NEXT STEPS

Three routes *forward*

ROUTE 01

More *enjoyment* in the game

After a lip-out, you would like the walk to the next tee to feel like part of the round again. This route gives that walk some attention, alongside the moments when you hit a shot worth enjoying. You still care about competing; you simply spend less of the afternoon arguing with something already finished.

GIVE THESE STEPS PRIORITY

ACCEPTANCE · TRANSFER · CONCENTRATION

You need room to leave disappointment behind, somewhere useful to put the lesson, and permission to switch off between shots. Acceptance, Transfer and Concentration give each of those moments a place in your round.

ROUTE 02

Better *performance*

With a narrow approach into a crosswind, you already know how to choose a playable target. This route concentrates on delivering that choice without a late correction and remembering what happened afterwards. The aim is a routine you recognise just as readily in a close match as in a casual round.

GIVE THESE STEPS PRIORITY

TRUST · ACCEPTANCE · TRANSFER

You have useful preparation to draw on, so the work belongs around execution and what follows it. Trust, Acceptance and Transfer help you swing with clearer intent and bring usable experience into the next round.

ROUTE 03

Enjoyment & performance

On a tight closing stretch, you want to stay competitive without making every disappointment the subject of the next walk. This route gives the missed shot a short ending, the next swing a clear intention, and the round one useful takeaway. Your standards stay intact while the afternoon feels less crowded.

GIVE THESE STEPS PRIORITY

ACCEPTANCE · TRANSFER · TRUST

You start by making room after the shot, then give useful lessons somewhere to go. Trust follows more naturally when you are not asking the next swing to settle the last result.

PRIORITIES

Where to begin — *your focus*

LEVERAGE YOUR STRENGTHS

FOCUS | CONCENTRATION | EVALUATION

Use Focus on a demanding approach by choosing the safe side of the flag and picturing the flight from behind the ball. Bring Concentration into a close match by returning your eyes to your chosen spot after your opponent plays. Apply Evaluation by watching the finish and describing the miss before returning your club to the bag.

HANDLING YOUR OPPORTUNITIES WELL

TRUST | TRANSFER | ACCEPTANCE

Start with Acceptance by lowering your shoulders after a miss and breathing out before walking. Add Transfer once that feels familiar, writing one useful lesson on your card after the round. Work on Trust next by rehearsing the intended finish once, then playing the shot without another technical rehearsal.

YOUR TOP 3 PRIORITIES NOW

1. Start with Acceptance so a disappointing result has a physical ending before you take your next club.
2. Build Transfer by saving one lesson from a carefully chosen shot in a note you read before your next round.
3. Develop Trust by carrying your chosen flight into one uninterrupted swing, finishing in balance over your front foot.

YOUR 4 WEEKS — STEP BY STEP

WEEK 1
Lower your shoulders after each miss, then breathe out slowly.

WEEK 2
Keep that release, then write one usable lesson after your round.

WEEK 3
Keep both habits; add one rehearsal of your intended finish before swinging.

WEEK 4
Rehearse, swing, release; write your one lesson after the round.

GETTING TO WORK

Your personal *action plan*

MEASURE IT ON THE COURSE — THIS ROUND

- ☐ Count misses after which you complete your physical release before taking ten steps.
- ☐ Record rounds where you write one lesson and read it before playing again.
- ☐ Count selected approaches where you finish your swing without adding a last-second technical instruction.

TEST THIS REPORT'S CORE YOURSELF

☐ Track misses across three rounds: well-struck shots with bad luck versus expected misses, noting whether you release each within ten seconds. If the first linger longer, this picture fits you; if not, adjust it.

Before

THE ROUND

- Mark a small box beside each hole number so you can record your release after a miss.
- Read your previous round's single lesson before choosing your opening tee-shot club.
- Hit six warm-up approaches with one flight picture and hold each finish until the ball lands.

During

ON THE COURSE

- Place your clubhead gently on the turf after a disappointment and breathe out before leaving the spot.
- Choose one approach per nine to play with a flight picture and no technical instruction over the ball.
- Write a three-word reminder beside one shot worth revisiting when the round is over.

After

REFLECTION

- Circle the first miss after which you arrived at the next ball without replaying the previous shot aloud.
- Write one lesson as a choice you can repeat, such as taking extra club into a crosswind.
- Put that lesson beside your tees so you read it before your next round.

TAKE THIS TO THE COURSE · PUT IT IN YOUR BAG

PRE-SHOT CUE	Stand behind your ball and picture the landing spot.
RESET LINE	Feel the ground beneath your feet again.

YOUR PROMISE SHEET

Chris

Chris, your answers suggest that you care about executing a shot well, even when nobody else would notice the difference. You deserve to enjoy your well-judged recovery, your committed putt and your quiet walk between them, not just your final score. You do not need to care less. Start with one small reset after a disappointing shot: put the club back in your bag, breathe out and turn towards your next shot. You can stay competitive and still enjoy the round.

YOUR MAIN MANTRA — THE LINE FOR THIS ROUND

> *"You commit; you let go."*

"The mind messes up more shots than the body."

— TOMMY BOLT

DEEP DIVE

Questions to *think about*

Write your first thoughts below. There are no right or wrong answers — only honest ones. You need not answer them straight away — feel free to come back later.

ON YOUR STRONGEST STEP — FOCUS

Where could you use your clear picture of the intended shot more deliberately around the green?

ON YOUR BIGGEST OPPORTUNITY — ACCEPTANCE

What do you keep asking a finished shot to give you while you walk towards the next one?

OVERALL — YOUR COMPLETE PROFILE

What would you notice on the course if you judged your response as carefully as your shot choice?

YOUR INTENTION FOR THE NEXT ROUND

Which single mental habit will you build in over the next four weeks? Describe when, how and what for.

PART 2 OF THE REPORT

Your Complete *Profile*

Per step and per factor — worked out in full

In this part each of your eight steps is worked out in full: a scene on the course you will recognise, your score, the five components read personally, concrete advice, two exercises and a mantra. Then come your four influencing factors, each with the four lenses. Use Part 2 as a reference — or share it with your coach.

THE EIGHT STEPS

1. Focus	8.1	**17**
2. Concentration	7.6	**19**
3. Conviction	7.0	**21**
4. Trust	6.2	**23**
5. Evaluation	7.3	**25**
6. Acceptance	4.4	**27**
7. Analysis	6.9	**29**
8. Transfer	5.2	**31**

THE FOUR FACTORS

Risk appetite	4.3	**34**
Pressure	5.0	**36**
Resilience	5.8	**38**
Readiness	7.4	**40**

FOR YOUR COACH — IN 90 SECONDS

BIGGEST GAIN
Your biggest opportunity is physically ending your reaction to a miss before turning your attention to the next ball.

CORE DIAGNOSIS
You report clear shot preparation and sound evaluation, but less reliable emotional release and recall; check which disappointing outcomes linger before changing your swing.

START QUESTION
"Which part of a disappointing shot are you still trying to settle when you reach the next ball?"

Every step has its own story.
This one is yours.

STEP 1 OF 8 · PRE

Focus

8.1/10

Influenced by: Risk appetite 4.3/10 · Readiness — the foundation

STRENGTH ★ Strongest step

A STRONG SIDE OF YOUR GAME

"You tend to know what the shot is for before you play it."

> *On hole 2, you face a 155-yard approach with a bunker left and a steady crosswind. You think, 'Middle-right, let the wind work,' and feel your grip settle. You send the ball towards the broad side of the green and leave an uphill putt.*

DEFINITION

You pick the target area, settle your club choice and see the ball flight before you swing. This includes course management: how do you play the hole strategically, in a way that suits your own game? Focus must be fully finished before you move on to concentration.

Facing a guarded green, you build a playable picture rather than aim automatically at the flag. Your Focus of 8.1/10 is a strength you can use throughout the round.

BLIND SPOT?

On a demanding closing approach, extend your clear picture to the recovery you would accept from either side. Explore that choice once with your pro beside a guarded practice green.

ON THE CARD · YOU GIVE DEMANDING HOLES A PLAYABLE SHAPE BEFORE THE BALL LEAVES THE CLUB.

You arrive over the ball with a clear job for the club.

IF YOU DO JUST ONE THING **Name your landing spot and safe miss before you take your stance.**

You choose the wide side of the green before deciding which club will reach it.

THE FIVE COMPONENTS OF FOCUS

Pick a target — RELATIVE WEAKEST

Use Pick a target to give yourself extra margin on narrow approaches.

See the shot — STRENGTH

With See the shot, you picture the crosswind moving your approach before taking your stance.

Judge it honestly — STRENGTH

You use Judge it honestly to choose enough club from a less-than-perfect lie.

Weigh the risk — STRENGTH

Through Weigh the risk, you favour the broad side when the flag offers little room.

Commit to it — STRENGTH

With Commit to it, you settle on your target before stepping into the ball.

You use Judge it honestly and Weigh the risk before Pick a target; See the shot helps make Commit to it a clear decision rather than a hopeful one.

PRIMARY ADVICE

Choose the widest useful landing area on a demanding approach, then point your club towards it from behind the ball.

Extra tip: *Picture one chip landing and rolling before you choose the club that produces it.*

MENTAL DRILL 1

Choose a middle-right landing spot under match pressure. Repeat on three closing approaches. Succeed by naming flight and safe miss each time. Then carry the same preparation into a club competition.

MENTAL DRILL 2

Picture a chip's landing and roll before choosing your club. Play eight balls on the practice green. Succeed with eight clear pictures. Then use the same sequence for three different lies.

MANTRA FOR THIS STEP — SPARE

One line for when you feel this step. Your main mantra is on your promise sheet.

"You pick the spot, then the club."

STEP 2 OF 8 · PRE

Concentration

Influenced by: Risk appetite 4.3/10 · Readiness — the foundation

7.6/10

STRENGTH

A STRONG SIDE OF YOUR GAME

"You can make a small patch of grass feel like the whole task."

> *On hole 4, you have a four-foot par putt while a trolley rattles beside the green. You think, 'Start it over that blade,' and let your jaw soften. You return your eyes to the ball and roll it along your chosen line into the cup.*

DEFINITION

You put all your attention on that one task — the ball to the target area — and shut out everything that is irrelevant right now: the last shot, the state of the match, outside noise and inner doubt.

When a sound interrupts your putting routine, you can return to the task without starting an argument with it. Your Concentration of 7.6/10 supports that useful steadiness.

BLIND SPOT?

Bring your ability to return to one blade of grass into a putting session with people moving nearby. Explore that transfer once with your pro while another group practises beside you.

02

ON THE CARD · YOU CAN KEEP INTERRUPTIONS OUTSIDE THE STROKE RATHER THAN CARRY THEM INTO IT.

You can find a quiet task even when the course stays noisy.

IF YOU DO JUST ONE THING **Return your eyes to one blade of grass before starting your putt.**

You hear a nearby conversation, then return your attention to the ball rather than following the voices.

THE FIVE COMPONENTS OF CONCENTRATION

Stay with it — RELATIVE WEAKEST

With Stay with it, you keep your chosen starting line through a pressured putt.

Park distractions — STRENGTH

Through Park distractions, you leave nearby conversation outside your putting routine.

Eye on ball — STRENGTH

You use Eye on ball to settle your gaze before the putter moves.

Reset — STRENGTH

With Reset, you step back comfortably when movement interrupts your address.

Relax between shots — STRENGTH

Through Relax between shots, you can enjoy the walk before narrowing attention again.

Park distractions and Relax between shots leave you fresher; Reset brings you back to Eye on ball, helping you Stay with it through the stroke.

PRIMARY ADVICE

Pick a small mark on your starting line and return your eyes there after any interruption.

Extra tip: *Look away from the scorecard between shots and notice one feature of the course as you walk.*

MENTAL DRILL 1

Return your eyes to a starting mark after nearby movement. Repeat on six match-play putts. Succeed when all six strokes follow the same routine. Then use it in your next competitive round.

MENTAL DRILL 2

Practise returning to one blade of grass while a partner walks nearby. Hit eight chips. Succeed with eight settled starts. Then repeat beside the busiest section of the practice green.

MANTRA FOR THIS STEP — SPARE

One line for when you feel this step. Your main mantra is on your promise sheet.

"You look back at this blade."

STEP 3 OF 8 · SWING

Conviction

Influenced by: Pressure 5.0/10 · Readiness — the foundation

7.0/10

STRENGTH

A STRONG SIDE OF YOUR GAME

"Once your choice feels right, you are willing to stand behind it."

> *On hole 6, the same crosswind meets a tee shot between fairway bunkers. You choose a three-wood and think, 'This is enough club.' Your hands feel ready, and you take the shot on, finding the fairway rather than reopening the driver debate.*

DEFINITION

You are convinced you will hit the shot exactly as intended. You want it, you can do it, you do it. Doubt is useless and has to be switched off completely, because without conviction there is no good performance.

With the three-wood selected, you can take responsibility for the choice and play positively. Your Conviction of 7.0/10 is a strength, expressed most clearly once your decision is settled.

BLIND SPOT?

Use the same positive walk-in after choosing a conservative lay-up, making the safer shot feel purposeful. Explore that once with your pro on a hole offering two sensible routes.

ON THE CARD · YOU CAN PLAY A CONSIDERED CHOICE POSITIVELY RATHER THAN TREAT CAUTION AS HESITATION.

You can stand behind a sensible choice without needing the most aggressive club.

IF YOU DO JUST ONE THING **Say your chosen shot once, then walk into your stance.**

You choose a demanding carry and step in believing the selected club can clear it.

THE FIVE COMPONENTS OF CONVICTION

Believe in it · START HERE — WORKING AREA

With Believe in it, you sometimes address a demanding approach still seeking reassurance.

Fully commit — STRENGTH

Through Fully commit, you step into your chosen tee shot with clear intent.

Fire yourself up — WORKING AREA

With Fire yourself up, you sometimes struggle to find purposeful tempo after waiting.

Take it on — STRENGTH

You use Take it on to face a demanding carry once the choice is made.

Back yourself — STRENGTH

With Back yourself, you trust your right to choose three-wood when driver feels unnecessary.

Once you Fully commit, Back yourself and Take it on follow readily; Believe in it and Fire yourself up are less settled before that decision.

PRIMARY ADVICE

Name the shot you intend to play, then take your stance without testing another club.

Extra tip: *Choose a purposeful lay-up target and rehearse the same positive tempo you use for an attacking approach.*

MENTAL DRILL 1

Choose your three-wood and state its intended flight with a match at stake. Repeat on three suitable tees. Succeed with three unchanged decisions. Then repeat during a qualifying round.

MENTAL DRILL 2

Choose a putt's pace and start line before addressing it. Roll ten practice putts. Succeed by keeping both decisions through eight strokes. Then use the sequence in a putting match.

MANTRA FOR THIS STEP — SPARE

One line for when you feel this step. Your main mantra is on your promise sheet.

"You back this club and shot."

STEP 4 OF 8 · SWING

Trust

Influenced by: Pressure 5.0/10 · Readiness — the foundation

6.2/10

WORKING AREA

SOLID — WITH ROOM TO SHARPEN FURTHER

"You know the shot, but sometimes try to supervise it through impact."

> *On hole 8, you need a faded seven-iron to the centre in the crosswind. You think, 'Don't turn it over,' and feel your fingers tighten. Unlike your tee shot on the sixth, you guide the face and leave the ball short-right in the bunker.*

DEFINITION

You hit the shot with full commitment: no hesitation, nothing held back. This is 'stand there and do it'. The prep is done; now the loyal execution, with the right balance of power and calm.

Over a shaped iron shot, you sometimes replace the flight picture with an instruction to your hands. Your Trust of 6.2/10 is a working area: execution is not yet consistently free.

ON THE CARD · YOU ARE MORE LIKELY TO DELIVER YOUR CHOSEN FLIGHT WHEN YOU STOP SUPERVISING THE CLUBFACE.

You can feel the difference between swinging towards a finish and protecting impact.

04

IF YOU DO JUST ONE THING **Rehearse your intended finish once, then swing to that finish.**

You let the rehearsed swing happen instead of changing the clubface on the way down.

THE FIVE COMPONENTS OF TRUST

Don’t steer · START HERE — WORKING AREA

With Don’t steer, you still tighten your fingers when a shaped approach matters.

No swing thoughts — WORKING AREA

Through No swing thoughts, you sometimes keep the flight picture, but technical checks still intrude.

Hit your plan — WORKING AREA

With Hit your plan, you sometimes protect the miss instead of swinging towards your target.

Stay loose — WORKING AREA

You find Stay loose less dependable when an iron must curve away from trouble.

Practise on purpose — WORKING AREA

Through Practise on purpose, you sometimes rehearse the shot, but still default to repetitive range swings.

When Don’t steer slips, you tighten up and Hit your plan becomes harder; Practise on purpose can make Stay loose and No swing thoughts more repeatable.

PRIMARY ADVICE

Rehearse the finish of your intended fade, then step in with that picture rather than a warning.

Extra tip: *Rest the clubhead behind the ball, soften your fingertips once and start without another technical check.*

MENTAL DRILL 1

Rehearse your fade finish, replacing 'Don't turn it over.' Hit ten seven-irons on the range. Succeed with eight uninterrupted swings and held finishes. Then use it on three approaches.

MENTAL DRILL 2

Roll practice putts while keeping one picture of the ball's pace. Play twelve from six feet. Succeed with nine strokes without a mid-stroke correction. Then repeat in a three-hole putting match.

MANTRA FOR THIS STEP — SPARE

One line for when you feel this step. Your main mantra is on your promise sheet.

"You swing to your finish."

STEP 5 OF 8 · POST

Evaluation

Influenced by: Resilience 5.8/10 · Readiness — the foundation

7·3/10

STRENGTH

A STRONG SIDE OF YOUR GAME

"You can describe the shot without turning it into a verdict on yourself."

> *On hole 10, your crosswind approach finishes beyond the flag on the upper tier. You think, 'Solid strike, landed past my spot,' and keep your shoulders level. You recognise a distance miss rather than call it a bad swing, leaving your technique alone for the downhill putt.*

DEFINITION

You note objectively what the ball did — strike feel, sound, direction, ball flight, distance, where it finished, divot — and match it against your Focus plan. This sets up the Analysis.

After an approach runs long, you can separate strike quality from finishing position. Your Evaluation of 7.3/10 helps you describe what happened without automatically blaming the swing.

BLIND SPOT?

Extend your useful distinction between strike and finish to chips that land well but release further than expected. Explore that once with your pro on a firm practice green.

ON THE CARD · YOU CAN KEEP A DISAPPOINTING FINISH FROM BECOMING AN UNNECESSARY ARGUMENT WITH YOUR TECHNIQUE.

You can make sense of a miss without making the whole round feel wrong.

05

IF YOU DO JUST ONE THING **Watch the ball finish, then name its landing spot and final position.**

You say the putt finished a foot right, rather than simply calling it terrible.

THE FIVE COMPONENTS OF EVALUATION

Watch closely · START HERE — WORKING AREA

With Watch closely, you sometimes look away before an approach finishes rolling.

Judge the miss — STRENGTH

Through Judge the miss, you distinguish a long finish from a poor strike.

Stay level-headed — STRENGTH

With Stay level-headed, you can describe a missed green without dismissing the whole shot.

Check your plan — STRENGTH

You use Check your plan to compare the actual landing with your intended spot.

Fixed order — STRENGTH

With Fixed order, you review the shot before deciding whether anything needs changing.

Your Fixed order supports Stay level-headed and Check your plan; Watch closely gives Judge the miss better facts to work with.

PRIMARY ADVICE

Rest your club lightly against your leg, breathe out, then describe where the ball landed and finished.

Extra tip: *Compare the actual landing spot with the one you chose before looking for a cause.*

MENTAL DRILL 1

Describe strike, landing and finish after each pressured approach. Repeat on three closing holes. Succeed with three factual descriptions, including any long miss. Then use the sequence in a club match.

MENTAL DRILL 2

Separate landing from rollout on the chipping green. Play ten chips to one spot. Succeed by naming both correctly on eight balls. Then repeat from rough with a partner checking.

MANTRA FOR THIS STEP — SPARE

One line for when you feel this step. Your main mantra is on your promise sheet.

"You assess the shot, not your worth."

STEP 6 OF 8 · POST

Acceptance

Influenced by: Resilience 5.8/10 · Readiness — the foundation

4.4/10

WORKING AREA

▼ Biggest opportunity

A WORKABLE BASE TO BUILD ON

"You can move on with your feet before the last shot leaves your head."

> *On hole 12, a five-foot par putt catches the edge and stays out. You think, 'That was the line,' and keep squeezing the putter as you leave the green. By the next tee, you're still explaining the lip-out instead of settling into the shot.*

DEFINITION

You accept the outcome of your shot, good or bad. It happened; you cannot change it any more. Emotions are allowed, but they have to be dealt with before you move to the next shot.

After a lip-out, you keep playing, but the conversation about it can continue into the next shot. Your Acceptance of 4.4/10 is a working area and your biggest opportunity.

ON THE CARD · YOU CAN ENJOY MORE OF THE WALK WHEN THE PREVIOUS SHOT STOPS TRAVELLING WITH YOU.

You carry a heavier round when finished shots keep demanding your attention.

06

IF YOU DO JUST ONE THING **Settle both feet after a miss and breathe out before walking.**

You feel annoyed by a lip-out, then leave the green without replaying it at the next tee.

THE FIVE COMPONENTS OF ACCEPTANCE

Let go · START HERE — GROWTH AREA

You keep playing; Let go is your growth area when a lip-out follows you off-green.

Be kind — WORKING AREA

With Be kind, you sometimes answer a missed par putt more harshly than intended.

Keep perspective — WORKING AREA

Through Keep perspective, you still struggle to keep one disappointing hole in perspective.

Play on — WORKING AREA

With Play on, you reach the next ball, but sometimes keep discussing the last.

Enjoy good shots — WORKING AREA

Through Enjoy good shots, you sometimes notice a fine approach only until the putt misses.

When Let go stalls, Play on becomes movement without relief; Be kind and Keep perspective give you room to Enjoy good shots as well as process misses.

PRIMARY ADVICE

Set both feet flat, breathe out longer than you breathe in, then walk towards your bag.

Extra tip: *Touch the putter cover after a missed putt, then put it on before discussing the next hole.*

MENTAL DRILL 1

Uncurl your fingers after each missed practice putt, then exhale. Repeat ten times. Succeed with eight releases before leaving your spot. Then use it after three disappointing putts on the course.

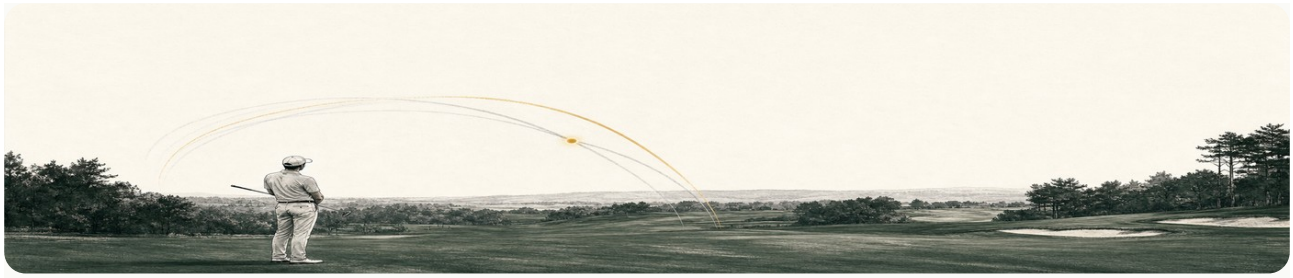

MENTAL DRILL 2

Rest both hands on your bag and breathe out after a disappointing shot. Practise over six holes. Succeed with four pauses before walking. Then repeat during a round where the score matters.

MANTRA FOR THIS STEP — SPARE

One line for when you feel this step. Your main mantra is on your promise sheet.

"You can leave it on the green."

STEP 7 OF 8 · POST

Analysis

Influenced by: Resilience 5.8/10 · Readiness — the foundation

6.9/10

WORKING AREA

SOLID — WITH ROOM TO SHARPEN FURTHER

"You can find a useful cause, but sometimes keep a second one alive."

> *On hole 15, you pull a wedge from a level fairway lie in the continuing crosswind. You think, 'Was that alignment or my hands?' and rehearse twice beside the divot. You reach your bag with two explanations and no clear choice about what needs attention.*

DEFINITION

You compare the shot you hit with the shot you had in mind during Focus. You look for the main cause of any difference — mental as well as technical — and draw one clear conclusion.

After a pulled wedge, you can identify sensible explanations but do not always settle on one. Your Analysis of 6.9/10 is a working area, close to becoming reliably useful.

ON THE CARD · YOU KEEP THE ROUND CLEARER WHEN YOU STOP ADDING EXPLANATIONS AFTER FINDING ONE USEFUL CAUSE.

You feel clearer when a miss has one useful explanation rather than several competing ones.

07

IF YOU DO JUST ONE THING **Choose one likely cause, then return your club to the bag.**

You distinguish poor alignment from a rushed swing before deciding what to practise later.

THE FIVE COMPONENTS OF ANALYSIS

Mental or technical? · START HERE — WORKING AREA

With Mental or technical?, you sometimes confuse a hurried decision with a swing fault.

One cause — STRENGTH

Through One cause, you can narrow a familiar miss to one useful explanation.

Spot the pattern — WORKING AREA

With Spot the pattern, you sometimes treat repeated wedge pulls as separate incidents.

Diagnose honestly — STRENGTH

You use Diagnose honestly to acknowledge poor alignment rather than blame the crosswind.

Ask for help — STRENGTH

With Ask for help, you bring an uncertain recurring miss to your pro.

One cause becomes more useful when Mental or technical? is clear; Diagnose honestly and Ask for help can then help you Spot the pattern across rounds.

PRIMARY ADVICE

Put the club across your thighs, breathe out, then choose one likely cause before returning it to your bag.

Extra tip: *Write one question beside an uncertain wedge miss and take it to your pro rather than rehearse competing fixes.*

MENTAL DRILL 1

Choose alignment or hand action after a pulled practice wedge. Review eight shots. Succeed with six single-cause notes and no second rehearsal. Then repeat after three misses during a practice round.

MENTAL DRILL 2

Review six shot notes at home and circle one supported cause for each. Succeed with four causes backed by a specific detail. Then check those four with your pro during practice.

MANTRA FOR THIS STEP — SPARE

One line for when you feel this step. Your main mantra is on your promise sheet.

"You pick one cause, not a collection."

STEP 8 OF 8 · POST

Transfer

Influenced by: Resilience 5.8/10 · Readiness — the foundation

5.2/10

WORKING AREA

A WORKABLE BASE TO BUILD ON

"You leave rounds with useful thoughts that do not always return when needed."

> *On hole 17, you face another crosswind approach with the flag on an upper tier. You think, 'What was the earlier lesson?' and pause with two clubs in your hands. You choose the longer club without a clear reason, and the ball runs beyond the green.*

DEFINITION

You give meaning to what the Analysis showed and carry it forward — you store it as an insight for after the round. That way you get to know your strengths and weaknesses over time and know exactly what to work on.

When a familiar crosswind approach returns, your earlier lesson is not always ready to use. Your Transfer of 5.2/10 is a working area: insights need a clearer place to live.

ON THE CARD · YOU GET MORE LASTING VALUE FROM A ROUND WHEN ONE LESSON RETURNS AT THE RIGHT MOMENT.

You finish more satisfied when a difficult moment leaves you something useful for later.

IF YOU DO JUST ONE THING **Write one lesson as a shot choice you can use again.**

You remember that a downhill lie lowered the wedge's flight and use that lesson on another day.

THE FIVE COMPONENTS OF TRANSFER

Misses teach you · START HERE — WORKING AREA

With Misses teach you, you sometimes leave a disappointing approach without saving its useful detail.

Look back — WORKING AREA

Through Look back, you revisit the round, but useful notes are not yet consistent.

Turn miss to aim — WORKING AREA

With Turn miss to aim, you sometimes remember frustration without setting a specific practice target.

Find the fix — WORKING AREA

Through Find the fix, you identify adjustments but do not always rehearse them later.

Keep one lesson — WORKING AREA

With Keep one lesson, you sometimes carry several thoughts instead of one usable reminder.

When you Look back without choosing Keep one lesson, Misses teach you less; Turn miss to aim and Find the fix need a specific detail to reuse.

PRIMARY ADVICE

Take your pencil out, breathe out, then write one choice you would repeat in the same conditions.

Extra tip: *Read your last lesson beside your bag and select one warm-up shot that puts it into use.*

MENTAL DRILL 1

Write a club-choice lesson from an upper-tier crosswind approach. Review three rounds. Succeed when each lesson names a situation and an action. Then read one before your next warm-up.

MENTAL DRILL 2

Read one saved lesson, then recreate its shot on the range. Hit six balls. Succeed by applying the written choice on five. Then use the lesson when that situation next appears.

MANTRA FOR THIS STEP — SPARE

One line for when you feel this step. Your main mantra is on your promise sheet.

"You keep one usable lesson."

PART 2 · CONTINUED

The four influencing factors

You have now seen your eight steps — the mental routine itself. But how well that routine holds up depends on four factors around it, in shot order: how you weigh **risk** before the shot, how **pressure** loads your swing, how quickly you **bounce back** after the shot, and how **ready** you are — the game you have available today.

They are not steps, but the conditions that decide whether the routine holds when it gets tense. We look at each factor through the same four lenses: Knowledge (what do you know?), Context (what is true here?), Dialogue (say the shot) and Self (are you ready to hit it?). Four factors times four lenses: sixteen sub-factors.

INFLUENCING FACTOR 1 OF 4

Risk appetite

Pre-shot: club, target, line and miss

4.3/10

WORKING AREA

A WORKABLE BASE TO BUILD ON

> *You have a tucked flag and enough club to reach it, but your usual iron pattern leaves little room beside the green. At your level, the tempting shot feels familiar; the question is whether you have enough evidence to make it your choice today.*

WHAT THIS FACTOR IS

Risk appetite sets the shot before commitment begins: which club, which target, which line and which miss you accept. It is neither courage nor caution. With a poor risk call the atmosphere decides — mood, ego or another player — and the numbers are guessed or ignored. With a good risk call the facts decide: a known carry, a clear target and an acceptable miss, and then full commitment. Judge the decision separately from the result.

Knowledge sets odds · context sets exposure · dialogue states reasons · self carries consequences

Your Risk appetite score of 4.3 puts your pre-shot choices in a working area. With your 6.3 handicap, you have options, but your decisions need firmer support from your actual shot pattern. Start there, and your club, target and acceptable miss can fit together more consistently.

HOW THIS HITS YOUR ROUTINE

Primarily in the pre-shot, in Focus and Concentration: club, target, line and miss. A good pre-shot produces a target that is specific, reachable and in line with your form. Skewed by risk appetite, the choice turns too aggressive or too cautious — and that happens before the swing, not inside it. In the swing it asks for commitment to the chosen shot; after the shot, for reviewing the decision, not the score.

> *Your scoring can become steadier when your targets fit the shots you reliably produce.*

OBSERVATION POINT · WATCH SOMEONE ELSE

Watch how your practice partner marks landing positions across a full set of shots, including the ordinary misses.

IF YOU DO JUST ONE THING Build your target around your normal shot spread.

THE FOUR SUB-FACTORS OF RISK APPETITE

KNOWLEDGE **Calibration** · START HERE — GROWTH AREA

Your Calibration needs more recorded evidence of your usual carry distances and shot spread.

CONTEXT **Exposure** — WORKING AREA

Your Exposure assessment needs a clearer account of the lie, carry, trouble and available landing room.

DIALOGUE **Rationale** — WORKING AREA

Your Rationale needs a clearer link between the evidence, conditions and your chosen club and target.

SELF **Tolerance** — WORKING AREA

Your Tolerance is developing; you can practise accepting uncertainty while standing behind your chosen shot.

PRIMARY ADVICE

Use your usual landing pattern to choose targets, especially with mid-irons, rather than planning around your best strike.

Extra tip: *Before a demanding carry, establish the distance and landing room, then choose a club with enough margin for your normal strike.*

DRILL 1 · ON THE COURSE

On the range, hit ten balls with your usual approach club at one target. Mark where each finishes and use the full spread to choose a realistic target corridor.

DRILL 2 · AT HOME

At home, sketch three familiar approach shots and overlay your recorded iron spread. Choose targets that accommodate that spread, then compare them with where you usually aim.

OBSERVATION POINT · CALIBRATION — *"Play your percentage."*

Watch for: Chooses from memory or best-case ability; no reference to stock dispersion or actual percentages.

Ask: What percentage shot is this for you? **Probe:** What evidence from practice or recent rounds supports that?

KEY LINE FOR THIS FACTOR

"You can commit more freely when your target respects the shot pattern you actually own."

INFLUENCING FACTOR 2 OF 4

Pressure

Swing: tension, tempo and freedom

5.0/10

WORKING AREA

A WORKABLE BASE TO BUILD ON

> *You reach the last tee with a score you want to bring home. The fairway has not narrowed, but you may feel your hands tighten and your swing lose its usual flow because this tee shot suddenly seems to carry the whole round.*

WHAT THIS FACTOR IS

Pressure makes the shot feel bigger than it is. It loads the routine — especially attention, tension and commitment — and is felt most in the swing: rushing, steering, a tighter grip, a shorter breath. Pressure can come from outside (a match, the cut, the final hole) or be added by yourself (the score, fear of the miss, wanting to prove something). The routine stays the same; only the load increases.

Knowledge locates the limit · context supplies load · dialogue frames meaning · self registers activation

Your Pressure score of 5.0 puts this in a working area. You have some awareness of when a round starts to feel bigger, but keeping the actual demand in proportion needs attention. At your level, the aim is to let your familiar swing remain available when the result matters.

HOW THIS HITS YOUR ROUTINE

Primarily in the swing: grip, breath, tempo and freedom. Conviction loses its ease and Trust is the most pressure-sensitive step of all — the urge to steer IS a pressure response. Pressure can already build in the pre-shot (outcome thinking, bodily tension); after the shot it asks you to keep the result in proportion.

> *Your scoring can become more consistent when important shots retain your familiar tempo and freedom.*

OBSERVATION POINT · WATCH SOMEONE ELSE

Watch whether your playing partner checks the match score and remaining distance before choosing a shot on a decisive hole.

IF YOU DO JUST ONE THING **Match the weight you give the shot to what the situation actually requires.**

THE FOUR SUB-FACTORS OF PRESSURE

KNOWLEDGE **Threshold** — WORKING AREA

Your Threshold awareness is developing; identify recurring moments when your attention or tempo starts to change.

CONTEXT **Demand** · START HERE — WORKING AREA

Your Demand assessment needs closer attention to what the shot and competitive situation actually require.

DIALOGUE **Narrative** — WORKING AREA

Your Narrative can keep the moment manageable when you give yourself a proportionate message.

SELF **Arousal** — WORKING AREA

Your Arousal needs tuning so your grip, breathing and tempo remain usable during execution.

PRIMARY ADVICE

Check what the match or score actually requires before treating a difficult hole as a moment you must win.

Extra tip: *Practise with modest consequences so you learn the level of nerves at which your usual swing still feels available.*

DRILL 1 · ON THE COURSE

On the range, give yourself six attempts to land four balls inside a realistic target area. If you miss the challenge, collect the practice balls before trying again. Notice when your normal tempo changes.

DRILL 2 · AT HOME

At home, picture a tight closing hole and write two lines: what the situation requires, and what you tell yourself it means. Shorten the second until your message feels proportionate.

OBSERVATION POINT · DEMAND — *"Read the stakes."*

Watch for: Treats every shot as equally important — or inflates the real score, format or consequence.

Ask: What does this shot actually require? **Probe:** Which consequence is real, and which is added?

KEY LINE FOR THIS FACTOR

"You can care about the result and still give this shot its ordinary swing."

INFLUENCING FACTOR 3 OF 4

Resilience

Post-shot: recover, reset and learn

5.8/10

WORKING AREA

SOLID — WITH ROOM TO SHARPEN FURTHER

> *You miss a short birdie putt, and the next tee shot arrives while you are still replaying it. You know how to play the hole, yet your attention has not quite caught up with where your feet are.*

WHAT THIS FACTOR IS

Resilience gets you to the next shot. It ends the carryover from the last shot and frees your attention for the next routine. As long as the previous shot is still playing — in your emotion, your tempo or your decisions — the reset is not finished. The reset is complete when you are available again for the shot in front of you.

Knowledge tracks the pattern · context selects the response · dialogue turns attention · self regains state

Your Resilience score of 5.8 sits in the working area. You are developing an understanding of your recovery patterns, but turning your attention forward is less consistent. With your 6.3 handicap, you can make the next shot demanding enough without asking it to settle the previous one.

HOW THIS HITS YOUR ROUTINE

Primarily in the post-shot: Evaluation keeps emotion calibrated, Acceptance closes the shot, Analysis turns it into information and Transfer carries one lesson forward. But carryover can also enter the next plan and disturb the next swing.

> *Your scoring can become steadier when one disappointment stops shaping the shots that follow.*

OBSERVATION POINT · WATCH SOMEONE ELSE

Listen for your playing partner's first forward-looking sentence after a missed putt, and notice what task it names.

IF YOU DO JUST ONE THING **Give yourself words that point toward the next playable task.**

THE FOUR SUB-FACTORS OF RESILIENCE

KNOWLEDGE **Trajectory** — WORKING AREA

Your Trajectory awareness is developing; trace where frustration usually fades and where it tends to linger.

CONTEXT **Agility** — WORKING AREA

Your Agility is developing as you adapt your recovery response to what the round now requires.

DIALOGUE **Reorientation** · START HERE — WORKING AREA

Your Reorientation needs clearer words that close the previous shot and name your next task.

SELF **Elasticity** — WORKING AREA

Your Elasticity is developing; you can regain playable attention while allowing disappointment to settle.

PRIMARY ADVICE

After a setback, give your next shot an ordinary job; you do not need to make the round feel right immediately.

Extra tip: *Use a brief forward-looking sentence when you catch yourself replaying a miss, then let the next task take your attention.*

DRILL 1 · ON THE COURSE

During nine practice holes, notice your first spoken words after each disappointing shot. Keep a simple tally of backward-looking and forward-looking comments, without trying to explain every miss.

DRILL 2 · AT HOME

At home, write three phrases you use after frustrating shots. Beside each, write a short alternative that points you toward the next playable task, then say it naturally aloud.

OBSERVATION POINT · REORIENTATION — *"Name the next task."*

Watch for: Keeps talking about the previous shot or cannot formulate one clear next task.
Ask: What matters now? **Probe:** Can you say the next job in one sentence?

KEY LINE FOR THIS FACTOR

"You do not need the next shot to put the previous one right."

INFLUENCING FACTOR 4 OF 4

Readiness

Whole routine: the game available today

7.4/10

STRENGTH

A STRENGTH THAT HOLDS YOUR ROUTINE UP UNDER PRESSURE

> *You arrive with dependable preparation, but today's warm-up shows a lower flight and less carry than you expected. You have enough experience to work with that game, and your opportunity is to make the day's plan just as clear as your preparation.*

WHAT THIS FACTOR IS

Readiness is the game available today. It matches your plan to the body, swing, numbers and equipment actually present. Not ready means the plan asks for a shot you cannot reliably produce today. Ready means you can stand over the ball and execute what has actually been prepared. Play the game you brought to the first tee.

Knowledge builds the base · context tests fit · dialogue formulates the plan · self provides presence

Your Readiness score of 7.4 is a strength across the whole routine. You bring a strong preparation base and adapt your game well to the day. Your next opportunity is to put that awareness into clearer instructions, so the game you have prepared is the game you actually ask yourself to play.

HOW THIS HITS YOUR ROUTINE

Readiness runs through the whole routine: an available body, numbers and shot in the pre-shot; an available swing and trust in the swing; and available attention to learn in the post-shot.

> *Your scoring can become more consistent when your plan matches the game available today.*

OBSERVATION POINT · WATCH SOMEONE ELSE

Listen as your practice partner describes today's available shots and turns that description into a clear plan before the first tee.

IF YOU DO JUST ONE THING Put today's available game into two clear instructions.

THE FOUR SUB-FACTORS OF READINESS

KNOWLEDGE **Foundation** — STRENGTH

Your Foundation is a strength, giving you reliable preparation and established evidence to draw on.

CONTEXT **Fit** — STRENGTH

Your Fit is a strength; you match your available game and equipment to the day's demands.

DIALOGUE **Formulation** · START HERE — WORKING AREA

Your Formulation needs clearer instructions that turn your reading of today's readiness into a usable plan.

SELF **Presence** — STRENGTH

Your Presence is a strength, bringing your body, attention and intention together for the whole routine.

PRIMARY ADVICE

Keep your dependable preparation, and make today's available carry distances and ball flight explicit before you reach the first tee.

Extra tip: *Turn your warm-up findings into two clear instructions about the clubs and shots you can rely on today.*

DRILL 1 · ON THE COURSE

During your warm-up, sample a wedge, mid-iron and tee club. Use the flight and carry you see to state two practical instructions for today's round, rather than adding another swing thought.

DRILL 2 · AT HOME

At home, write a short plan for a day when your back feels stiff or preparation time is limited. Name the available shots, useful equipment and realistic warm-up time.

OBSERVATION POINT · FORMULATION — *"Call today's game."*

Watch for: Cannot diagnose present readiness or state one plan that fits current capacity and conditions.

Ask: What game have you brought today? **Probe:** Say one plan that fits it.

KEY LINE FOR THIS FACTOR

"You have a strong foundation; let today's game decide how you use it."

ONE EXTRA INTERVENTION

Learning by observing

With each of your four factors comes an **observation point**. That is no side note — it is an intervention in itself. Your sharpest insight into your own mental game often comes not from looking inward, but from *someone else* watching.

When you deliberately watch how a playing partner handles pressure, a missed putt, a risky decision, two things happen at once. You see a pattern you do not spot so easily in yourself — the tension in the shoulders on the first tee, the tempo that changes after a bad shot, the club picked too quickly. And right at that moment you become more aware of your own routine and your own factors. Observing makes the abstract concrete.

> *The beauty is: it costs you nothing extra. You already play in company. By watching one thing in someone else for one round at a time, you build an eye for the mental game — which you then turn on yourself. What you learn to spot in others, you recognise in yourself.*

HOW TO GO ABOUT IT

Pick one factor per round. In yourself or in one playing partner, watch the observation point that belongs to it. Fact first — what a camera would capture — and only then the meaning. Wait for three comparable moments before you call it a pattern. After the round, ask yourself: what did I see, and did I recognise it in myself too?

FINALLY

This is *yours now*

Chris, the next difficult hole does not ask you to become a different person. You can still care about the line, the flight and the match, and notice the trees on the walk between shots. Give yourself one small action you are willing to repeat when the round becomes untidy. Your next round is somewhere to find out what that feels like.

WANT TO GO FURTHER?

The next step *in your story*

Reading a report changes nothing on the course yet — you know that. The real gain, and the real fun, only start when you pick one thing and work on it. And you do not have to do that alone.

For that, MentalRoutine builds from exactly this profile a personal **Training report**: a personal workbook of around ten pages, tuned to your scores and your level of play. No generic tips, but exercises, mantras and stories that fit where you stand now — the logical next step after what you have just read about yourself.

YOUR PERSONAL ADVICE

Where you are best *placed to begin*

We laid your full profile side by side: your eight steps with their forty components, and your four influencing factors. Below are the three topics where training pays off most for you now — your two biggest opportunities and your strongest step. The same three are waiting as advice in your portal.

YOUR THREE RECOMMENDED TOPICS

Each its own training report — together exactly the three included with your assessment.

1. Acceptance
start with: Let go

IMPROVE
score 4.4/10

2. Transfer
start with: Misses teach you

IMPROVE
score 5.2/10

3. Focus
start with: Pick a target

LEVERAGE
score 8.1/10

OR CHOOSE AN INFLUENCING FACTOR

You can also spend one of your three reports on a factor. For you, **Risk appetite** (4.3/10) is the obvious choice — start there with **Calibration** — *"Play your percentage."*

HOW TO START

Start with the first topic: that is where the most is to be gained. Rather go another way? In your portal you choose freely from all twelve topics.

Your training reports are waiting in your portal — that is where you choose what to pick up first.

Go to the portal →

AFTER THIS REPORT

How your *training works*

HOW A TRAINING REPORT WORKS

A STEP OF YOUR ROUTINE

Trains one of your eight steps through five angles, tuned to your score on each component. Choose this if you want to work on a part of your routine.

AN INFLUENCING FACTOR

Trains one of your four factors through the four lenses: knowledge, context, dialogue and self. Choose this if the terrain around your routine costs you most.

> Nothing extra to arrange: three training reports are included with your assessment, and you choose them yourself from all twelve topics — your eight steps and your four factors. Everything is ready in your portal, at your own pace.

TWO WAYS TO GROW

IMPROVE

With a lower score. The report motivates and builds: small, doable steps that make your weak spot stronger bit by bit. This is often the quickest gain.

LEVERAGE

With a high score. The report inspires: how do you use a strength you already have even more deliberately, so it wins you shots on the holes that count?

WHEN TO MEASURE AGAIN?

Give yourself 3 to 6 months to work with your training reports and the advice in this report, and make sure you really practise in that period — count on at least 6 to 10 rounds or 8 to 12 practice sessions where you work on it deliberately. Then take the MentalRoutine Assessment again. Where you truly changed something, you will see it as a clear shift in your profile — not in a single decimal, but in the direction a whole step moves.

"The greens are not going anywhere. The game will always be here for you. What you choose to do with what you've learned — that's entirely yours."

— MENTALROUTINE · WWW.MENTALROUTINE.COM
