PERSONAL MENTAL REPORT

Make your best golf repeatable

Stay calm. Keep moving forward.

Your QuickScan score is 6.6/10: a workable base with clear opportunities. With a 6.3 handicap, your Focus already stands out at 8.0/10. Acceptance, at 4.6/10, is where more calm and enjoyment can grow.

6.6

MENTAL TOTAL SCORE

Based on 40 questions and the 8 steps of the MentalRoutine

© 2026 MentalRoutine for Golfers · mentalroutine.com

Welcome, Chris

Great that you took the QuickScan. This report is yours — built from your own answers.

Thank you for taking the QuickScan. You already have a clear strength: Focus helps you choose a target and commit your attention before the shot. Your biggest opportunity is Acceptance, especially after a disappointing result. That connects with wanting more consistency, recovering faster and keeping golf enjoyable. The pages ahead show how to turn both qualities into a reliable routine.

WHAT YOU RECOGNISED YOURSELF

"I can't reproduce my best golf consistently."

"I can't shake off a bad shot."

"I want to improve, but I still want golf to be fun."

It makes sense that inconsistency and lingering frustration feel familiar. In your results, Focus is a clear strength, while Acceptance and Transfer show where the next shot can still be influenced by the previous one.

HOW TO READ THIS REPORT

1. Your shot routine — how you move through the three phases of every shot: before, during and after.
2. The 8 steps — where your strongest step and your two biggest growth opportunities are.
3. Your strength and your growth opportunities — what your scores mean, how you recognise them on the course and what to do about them.
4. Reflection and AI coaching — a question and ready-to-use prompts to take it further yourself.
5. Your action plan — concrete micro-actions for your next round.

Tip: read it at your own pace, pick one thing and take it into your next round.

WHAT THIS QUICKSCAN COVERS — AND WHAT IT DOESN'T

In this QuickScan

- ✓ The 3 phases of your shot routine
- ✓ The 8 steps — your strongest step and your 2 biggest growth opportunities worked out
- ✓ An action plan and AI coaching prompts

40 questions · about 8 minutes

Only in the full assessment

- + All 8 steps worked out, with their 5 components
- + The 4 influencing factors: risk appetite, pressure, resilience and readiness
- + 3 training reports of your choice

20–25 minutes · more questions per step

This QuickScan is a first snapshot. The full assessment looks deeper — with more questions per step and the 4 influencing factors — and so gives a fuller, more precise picture. Your scores there may therefore turn out differently from here.

Your ShotRoutine (3 phases)

Every golfer goes through the same shot routine on every single shot: preparation, execution and processing. Consciously or not. The MentalRoutine maps these three phases through 8 underlying steps. Together, they determine what your mental game truly looks like.

PRE-SHOT

7.7 /10

STRENGTH

Pre-Shot is your preparation before the shot: choose, picture and commit. It combines Focus and Concentration.

At 7.7/10, you usually stand over the ball prepared. You find a clear intention. Under pressure, attention can still drift before you start.

SWING

6.6 /10

WORKING AREA

Swing is the moment you execute the shot. It combines Conviction and Trust.

At 6.6/10, you can make a committed swing. A poor thought or lie may trigger last-second steering. Your best swings begin without negotiation.

POST-SHOT

6.0 /10

WORKING AREA

Post-Shot covers everything after impact. It combines Evaluation, Acceptance, Analysis and Transfer.

At 6.0/10, a good shot can lift you and a poor one can linger. You notice what happened, but may carry it into the next decision. A quicker reset will help.

WHAT STANDS OUT?

Your strongest phase is Pre-Shot at 7.7/10: you prepare with purpose. Post-Shot is the biggest opportunity at 6.0/10. After a poor approach, the key is to release it quickly and turn it into one useful lesson.

> *"Golf is a game that is played on a five-inch course — the distance between your ears."*
>
> — BOBBY JONES

In the full assessment you also see how the 4 influencing factors — risk appetite, pressure, resilience and readiness — act on each phase of your routine.

Your MentalRoutine (8 steps)

Your strongest step and your two greatest growth opportunities are fully visible. The remaining 5 steps are available in the full assessment. Each step has 5 components you can specifically leverage or improve.

PRE-SHOT

Focus

8.0

★ STRONGEST STEP

Focus is choosing a specific target area and visualising the ball's flight. Without a clear target, every shot is a guess.

Concentration

SEE FULL ASSESSMENT

Concentration is full attention on the execution — 'ball to target area'. All distractions are blocked out.

SWING

Conviction

SEE FULL ASSESSMENT

Conviction is belief in your own abilities at the moment of execution. 'I want it. I can do it. I will do it.'

Trust

SEE FULL ASSESSMENT

Trust is unconditional commitment when executing the shot — without hesitation or last-minute adjustments.

POST-SHOT

Evaluation

SEE FULL ASSESSMENT

Evaluation is systematically observing what happened with the ball — direction, flight, distance and final position.

Acceptance

4.6

▼ GREATEST GROWTH OPPORTUNITY

Acceptance is processing the outcome, positive or negative, without emotions affecting your next shots.

Analysis

SEE FULL ASSESSMENT

Analysis is identifying the most likely cause of any deviation — mental or technical — in no more than ten seconds.

Transfer

5.4

▼ SECOND GROWTH OPPORTUNITY

Transfer is converting a missed performance goal into a concrete learning goal for the next shot and practice.

This is where your strength lies

This step is your greatest mental asset on the course. Understand it — and use it even better.

8.0

STRONGEST STEP

Focus

You give your shots a clear destination.

WHAT DOES THIS SUGGEST?

8.0/10 is an exceptionally strong result. Focus is clearly above average among golfers.

You naturally look for a specific target rather than simply hitting toward the fairway. With a 6.3 handicap, that clarity supports your precise decisions. Your next edge is seeing the full shot, not only the target.

HOW IS THIS VISIBLE ON THE COURSE?

On the 14th, your drive leaves a tight fairway and you face a demanding approach. You pick a precise landing area instead of staring at the pin. You picture the ball starting there and flying to it. That clear destination keeps the swing committed.

HOW CAN YOU USE THIS EVEN BETTER?

→ Pick a landing area, then name the exact starting line before every shot.

→ See the ball's full flight, including its landing and first bounce.

→ Once the picture is clear, step in and swing before new doubts appear.

In the full assessment you see which of the 5 components of Focus carry your strength — and how to use them deliberately in the moments that matter.

This is your greatest growth opportunity

This is the step where focused attention will deliver the most return for your game.

4.6

GREATEST GROWTH OPPORTUNITY

Acceptance

Your next level begins when you let the last shot go.

WHAT DOES THIS SCORE SAY?

At 4.6/10, Acceptance is a genuine growth area, especially after mistakes.

Stronger Acceptance brings calmer decisions, more enjoyment and may support a few strokes of improvement. You stay available for the next shot.

Acceptance protects the next shot from the last one. You already know how to be kind to yourself; the next step is letting the result go without replaying it. That creates room for calm decisions.

HOW DO YOU RECOGNISE THIS ON THE COURSE?

On the 8th, an iron finishes short after you expected a perfect number. You tell yourself you should have committed better, then carry that irritation to the next tee. The hole becomes a verdict instead of information. A simple “that’s done; now choose” can change the next decision.

HOW CAN YOU IMPROVE THIS?

→ Name the result once, exhale, and say: “That shot is finished.”

→ Walk to the next shot without replaying the swing or judging yourself.

→ Use one neutral fact, then return to your target and routine.

Say it after impact when frustration starts pulling your attention backward.

"I release this shot and choose the next one."

YOUR PERSONAL MANTRA

In the full assessment you see which of the 5 components of Acceptance offer the most room and which factors act on them — with a training report to work on it in a focused way.

Your second growth opportunity

Here too, focused attention will deliver clear returns for your game.

5.4

SECOND GROWTH OPPORTUNITY

Transfer

Turn every miss into a useful next decision.

WHAT DOES THIS SCORE SAY?

At 5.4/10, Transfer is a workable base with clear room to improve.

Stronger Transfer turns misses into better choices, more calm and more enjoyment. Over time, it may support a few strokes of improvement.

Transfer keeps one mistake from becoming a pattern. You already recognise that misses can teach you; now look back briefly and carry one clear lesson to the next shot.

HOW DO YOU RECOGNISE THIS ON THE COURSE?

On the 12th, your approach misses right, but you never decide why. Two holes later, you face a similar shot and repeat the same choice. A ten-second look back—target, strike or decision—gives you something useful to take forward.

HOW CAN YOU IMPROVE THIS?

- → After each miss, name one likely cause before you take the next club.
- → Ask: “What will I repeat or change on the next similar shot?”
- → Write one lesson after the round, not a list of everything that went wrong.

Use it after a miss to turn the result into one practical adjustment.

"This miss teaches me my next choice."

YOUR PERSONAL MANTRA

In the full assessment you see which of the 5 components of Transfer offer the most room and which factors act on them — with a training report to work on it in a focused way.

Reflect and go deeper

REFLECTION QUESTION

After a poor approach, are you learning from the shot—or quietly trying to erase what just happened?

AI PROMPT: LEVERAGE YOUR STRENGTH

I’m a 6.3-handicap golfer, and Focus means choosing a precise target and picturing the ball’s flight before I swing. On a tight approach, that clear picture helps me commit instead of steering. How can I make this strength even more reliable under pressure?

FOLLOW-UP PROMPTS

> I choose targets well but sometimes picture only the landing spot. How can I improve my full-shot visualisation?

> My focus is strong on normal holes. How can I protect it when a tight fairway or difficult pin raises the pressure?

AI PROMPT: WORK ON YOUR GROWTH POINT

I’m a 6.3-handicap golfer. Acceptance means processing a shot without letting its emotion affect the next one. After a short approach, I can replay the mistake and carry frustration to the next tee. How can I learn to release the result sooner?

FOLLOW-UP PROMPTS

> After a poor approach, I replay it while walking. What one reset can stop that loop before my next shot?

> In competition, one mistake can affect my next hole. How can I accept it without becoming careless or overly positive?

Reflect and go deeper

AI PROMPT: WORK ON YOUR SECOND GROWTH POINT

> I’m a 6.3-handicap golfer. Transfer means turning a missed performance goal into one useful lesson for my next shot. After a right-missed approach, I often move on without identifying whether the cause was target, strike or decision. How can I build a simple look-back routine?

FOLLOW-UP PROMPTS

> I often forget the lesson after a miss. How can I look back in ten seconds after an approach without overanalysing it?

> I repeat poor decisions on similar holes. How can I capture one useful lesson and apply it later in the round?

Copy these prompts into ChatGPT, Claude, or another AI assistant. Add your own context for an even more personalised answer.

Your action plan for the course

Concrete micro-actions for your next round — before, during and after.

Before the round

- Picture one full shot to a precise target, then rehearse your release phrase: "That shot is finished."
- Write your three-part reset: observe, accept, prepare. Keep it in your scorecard.
- Choose one landing area on the practice green and visualise the ball finishing there.

During the round

- After impact, state one fact, exhale and walk on. Do not replay the swing.
- Before each shot, pick the target and picture the full flight before stepping in.
- After a miss, identify one cause and one next-shot adjustment within ten seconds.

After the round

- Review three shots: what happened, what you accepted, and what lesson you transferred.
- Mark one moment when you released a result well and repeat that behaviour next round.
- Choose one recurring miss and write the single decision you will test next time.

EVALUATE YOUR ACTION PLAN AFTER THE ROUND

How well did you follow your action plan? Mark the number that fits best:

1	2	3	4	5

1 = not at all · 3 = partly · 5 = fully executed

This action plan is designed to be used for every round. Use it as preparation before you play and as a mirror afterwards. The more consistently you apply it, the greater the effect.

"The most important shot in golf is the next one."

— BEN HOGAN

YOUR NEXT SHOT STARTS HERE

You've seen the beginning. This is the full picture.

This Quickscan shows three steps. Your complete mental game has 8 — plus the 4 factors that make or break your routine.

THIS QUICKSCAN · FREE

- ✓ 3 steps mapped (strongest + 2 growth areas)
- ✓ 3 phase scores (Pre-Shot, Swing, Post-Shot)
- ✓ Personal action plan + AI coaching prompts

FULL ASSESSMENT · ~~$79~~ $69

- ✓ All 8 steps in full — not 3, but your complete mental profile
- ✓ The 5 steps still locked right now — finally revealed
- ✓ The 4 factors that strengthen or undermine your routine: risk appetite, pressure, resilience and readiness
- ✓ Every exercise, text and tip unique to you — no two reports are the same
- ✓ Tailored to your scores and your handicap — no generic advice
- ✓ 3 training reports of your choice: each a concrete workbook of around ten pages
