PERSONAL MENTAL REPORT

Your mental game, made clear
Turn calm into better golf

Your QuickScan score is 6.6/10: a workable base with clear opportunities. With handicap 24, you already trust your swing strongly. The biggest shift is learning to let go after a shot, especially when frustration lingers.

6.6

MENTAL TOTAL SCORE

Based on 40 questions and the 8 steps of the MentalRoutine

© 2026 MentalRoutine for Golfers · mentalroutine.com

Welcome, Sam

Great that you took the QuickScan. This report is yours — built from your own answers.

Thank you for completing the QuickScan. You have a solid platform: Trust is your strongest step, so you can commit well when it matters. Acceptance is where more calm and enjoyment can grow, especially after a disappointing shot. You also recognise that golf can stay with you longer than you would like, and that practice is easy to postpone. The pages ahead turn that insight into simple actions for your next round.

WHAT YOU RECOGNISED YOURSELF

"I can't shake off a bad shot."

"I love golf, but it gets to me more than it should."

"I know I should practise more. It just doesn't happen."

It makes sense that a poor shot can stay on your mind and affect the next one. In your scores, you can see a strong ability to commit, alongside a clear opportunity to release the previous outcome and return to the present.

HOW TO READ THIS REPORT

1. Your shot routine — how you move through the three phases of every shot: before, during and after.
2. The 8 steps — where your strongest step and your two biggest growth opportunities are.
3. Your strength and your growth opportunities — what your scores mean, how you recognise them on the course and what to do about them.
4. Reflection and AI coaching — a question and ready-to-use prompts to take it further yourself.
5. Your action plan — concrete micro-actions for your next round.

Tip: read it at your own pace, pick one thing and take it into your next round.

WHAT THIS QUICKSCAN COVERS — AND WHAT IT DOESN'T

In this QuickScan

- ✓ The 3 phases of your shot routine
- ✓ The 8 steps — your strongest step and your 2 biggest growth opportunities worked out
- ✓ An action plan and AI coaching prompts

40 questions · about 8 minutes

Only in the full assessment

- + All 8 steps worked out, with their 5 components
- + The 4 influencing factors: risk appetite, pressure, resilience and readiness
- + 3 training reports of your choice

20–25 minutes · more questions per step

This QuickScan is a first snapshot. The full assessment looks deeper — with more questions per step and the 4 influencing factors — and so gives a fuller, more precise picture. Your scores there may therefore turn out differently from here.

Your ShotRoutine (3 phases)

Every golfer goes through the same shot routine on every single shot: preparation, execution and processing. Consciously or not. The MentalRoutine maps these three phases through 8 underlying steps. Together, they determine what your mental game truly looks like.

PRE-SHOT

7.0 /10

STRENGTH

Pre-Shot is your preparation before the ball: choose and picture the shot. It includes Focus and Concentration.

At 7.0/10, you usually prepare with purpose. You can still let a hazard or playing partner pull your attention away. A clear picture before moving helps.

SWING

7.3 /10

STRENGTH

Swing is the shot itself: commit and execute. It includes Conviction and Trust.

At 7.3/10, you generally swing with commitment. You rarely need extra thoughts over the ball. When steering appears late, let the original swing go.

POST-SHOT

6.0 /10

WORKING AREA

Post-Shot is everything after impact: observe, respond and learn. It includes Evaluation, Acceptance, Analysis and Transfer.

At 6.0/10, one poor shot can occupy too much space. You notice what happened, but emotion may follow you. A brief reset brings you back sooner.

WHAT STANDS OUT?

Your strongest phase is Swing at 7.3/10: you can commit over the ball. Post-Shot is 6.0/10, so the key moment is what happens after a topped drive or missed putt. That is where a calmer reset can change the next decision.

> *"Golf is a game that is played on a five-inch course — the distance between your ears."*
>
> — BOBBY JONES

In the full assessment you also see how the 4 influencing factors — risk appetite, pressure, resilience and readiness — act on each phase of your routine.

Your MentalRoutine (8 steps)

Your strongest step and your two greatest growth opportunities are fully visible. The remaining 5 steps are available in the full assessment. Each step has 5 components you can specifically leverage or improve.

PRE-SHOT

Focus

SEE FULL ASSESSMENT

Focus is choosing a specific target area and visualising the ball's flight. Without a clear target, every shot is a guess.

Concentration

SEE FULL ASSESSMENT

Concentration is full attention on the execution — 'ball to target area'. All distractions are blocked out.

SWING

Conviction

SEE FULL ASSESSMENT

Conviction is belief in your own abilities at the moment of execution. 'I want it. I can do it. I will do it.'

Trust

7.6

★ STRONGEST STEP

Trust is unconditional commitment when executing the shot — without hesitation or last-minute adjustments.

POST-SHOT

Evaluation

SEE FULL ASSESSMENT

Evaluation is systematically observing what happened with the ball — direction, flight, distance and final position.

Acceptance

5.5

▼ GREATEST GROWTH OPPORTUNITY

Acceptance is processing the outcome, positive or negative, without emotions affecting your next shots.

Analysis

6.0

▼ SECOND GROWTH OPPORTUNITY

Analysis is identifying the most likely cause of any deviation — mental or technical — in no more than ten seconds.

Transfer

SEE FULL ASSESSMENT

Transfer is converting a missed performance goal into a concrete learning goal for the next shot and practice.

This is where your strength lies

This step is your greatest mental asset on the course. Understand it — and use it even better.

7.6

STRONGEST STEP

Trust

You commit when it is time to swing.

WHAT DOES THIS SUGGEST?

Trust at 7.6/10 is clearly above average. It is a genuine strength you can build around.

You can stand over a shot and let the swing happen. For a recreational golfer with handicap 24, that commitment is valuable when the hole feels awkward. Your best golf appears when you stop searching and trust the motion you chose.

HOW IS THIS VISIBLE ON THE COURSE?

On the 12th, your drive leaves a narrow fairway and a bunker guards the right side. You choose the safe line, picture the ball and step in without adding swing thoughts. You commit rather than steer the club toward safety. That quiet decision lets your natural motion do its job.

HOW CAN YOU USE THIS EVEN BETTER?

→ Choose the shot, then step in before doubt starts.

→ Use one cue only: “ball to target area.”

→ If steering appears, step away and restart your routine.

In the full assessment you see which of the 5 components of Trust carry your strength — and how to use them deliberately in the moments that matter.

This is your greatest growth opportunity

This is the step where focused attention will deliver the most return for your game.

5.5

GREATEST GROWTH OPPORTUNITY

Acceptance

Letting go can become your next real strength.

WHAT DOES THIS SCORE SAY?

Acceptance at 5.5/10 is a clear growth area, and an entirely workable one.

Stronger Acceptance brings more calm after mistakes, better choices and more enjoyment. It may also create room for a few more good outcomes on the scorecard.

Acceptance keeps one shot from taking control of the next. You already know how to be kind to yourself; now practise letting the emotion pass without carrying it to the next tee.

HOW DO YOU RECOGNISE THIS ON THE COURSE?

On the 6th, a pushed approach finishes behind a tree. You think, “Not again,” and replay the swing while walking to your ball. The next shot becomes rushed because the first one is still alive in your head. Notice it, name it and let the next shot start clean.

HOW CAN YOU IMPROVE THIS?

- → Name the result once: “That shot is finished.” Then breathe out.
- → Walk to the next ball with relaxed shoulders, not a replay.
- → After a mistake, say: “Next target, fresh decision.”

Repeat it after impact whenever frustration tries to follow you.

"I release it and choose the next shot."

YOUR PERSONAL MANTRA

In the full assessment you see which of the 5 components of Acceptance offer the most room and which factors act on them — with a training report to work on it in a focused way.

Your second growth opportunity

Here too, focused attention will deliver clear returns for your game.

6.0

SECOND GROWTH OPPORTUNITY

Analysis

A clearer read turns mistakes into useful information.

WHAT DOES THIS SCORE SAY?

Analysis at 6.0/10 is developing, with room to become more precise and useful.

Better Analysis helps you stay calm and choose smarter adjustments. You learn faster, enjoy the round more and may create a few better results.

Analysis stops you from guessing after a poor shot. You already spot recurring patterns; the next step is deciding whether the cause was mental or technical before changing anything.

HOW DO YOU RECOGNISE THIS ON THE COURSE?

On the 9th, two irons finish short. You immediately blame the club and change your swing, but the real issue may be a rushed routine. Pause for ten seconds: was it mental or technical? One clear answer gives you a better next choice.

HOW CAN YOU IMPROVE THIS?

- → After each miss, ask: “Mental or technical?” Choose one cause.
- → Record direction, flight and distance before judging the swing.
- → Look for the same pattern across three shots, not one.

Use it after a miss to replace instant judgement with a clear read.

"I observe first, then I adjust."

YOUR PERSONAL MANTRA

In the full assessment you see which of the 5 components of Analysis offer the most room and which factors act on them — with a training report to work on it in a focused way.

Reflect and go deeper

REFLECTION QUESTION

After a poor shot, are you accepting the result—or still trying to win the previous shot back?

AI PROMPT: LEVERAGE YOUR STRENGTH

I play off handicap 24. Trust means I can choose a shot and commit without extra swing thoughts, even on a narrow fairway with trouble nearby. How can I use this commitment more consistently when the pressure or consequences feel bigger?

FOLLOW-UP PROMPTS

> I trust my swing best when I keep things simple. How can I recognise the first sign that I am starting to steer?

> I can commit on ordinary holes, but tougher tee shots test me. How can I protect my trust when the safe target feels small?

AI PROMPT: WORK ON YOUR GROWTH POINT

I play off handicap 24. Acceptance means letting go after a poor shot, but on the 6th I can replay a pushed approach while walking to the next ball. How can I release that emotion sooner and start the next shot fresh?

FOLLOW-UP PROMPTS

> After a poor approach, I keep thinking "not again" before the next shot. What reset can help me leave that result behind?

> I often recover poorly after one bad hole. How can I accept the hole without letting its emotion shape the next tee shot?

Reflect and go deeper

AI PROMPT: WORK ON YOUR SECOND GROWTH POINT

> I play off handicap 24. Analysis means identifying the most likely cause of a shot, but after two short irons I often change my swing without knowing whether the issue was mental or technical. How can I learn to separate those causes and make one useful adjustment?

FOLLOW-UP PROMPTS

> I often analyse a poor approach while still feeling frustrated. How can I tell whether a rushed routine or a technical error caused the shot?

> I sometimes see the same miss but react differently each time. What simple tracking method can help me spot the real pattern?

Copy these prompts into ChatGPT, Claude, or another AI assistant. Add your own context for an even more personalised answer.

Your action plan for the course

Concrete micro-actions for your next round — before, during and after.

Before the round

- Write your mantra on your scorecard: "I release it and choose the next shot."
- Before teeing off, picture one committed swing and one calm response to a miss.
- Choose one simple swing cue; promise yourself no extra thoughts over the ball.

During the round

- After impact, exhale and say: "Finished." Then walk on without a replay.
- Before the next shot, name the target and commit as you normally do.
- After a miss, ask once: "Mental or technical?" Then choose one response.

After the round

- Note one shot you released well and what helped you move on.
- Record one repeated miss with its direction, flight and distance.
- Choose one learning goal for your next practice, not a punishment.

EVALUATE YOUR ACTION PLAN AFTER THE ROUND

How well did you follow your action plan? Mark the number that fits best:

1	2	3	4	5

1 = not at all · 3 = partly · 5 = fully executed

This action plan is designed to be used for every round. Use it as preparation before you play and as a mirror afterwards. The more consistently you apply it, the greater the effect.

"The most important shot in golf is the next one."

— BEN HOGAN

YOUR NEXT SHOT STARTS HERE

You've seen the beginning. This is the full picture.

This Quickscan shows three steps. Your complete mental game has 8 — plus the 4 factors that make or break your routine.

THIS QUICKSCAN · FREE

- ✓ 3 steps mapped (strongest + 2 growth areas)
- ✓ 3 phase scores (Pre-Shot, Swing, Post-Shot)
- ✓ Personal action plan + AI coaching prompts

FULL ASSESSMENT · ~~$79~~ $69

- ✓ All 8 steps in full — not 3, but your complete mental profile
- ✓ The 5 steps still locked right now — finally revealed
- ✓ The 4 factors that strengthen or undermine your routine: risk appetite, pressure, resilience and readiness
- ✓ Every exercise, text and tip unique to you — no two reports are the same
- ✓ Tailored to your scores and your handicap — no generic advice
- ✓ 3 training reports of your choice: each a concrete workbook of around ten pages
